User Manual

ALL-IN-ONE SOLAR STREET LIGHT

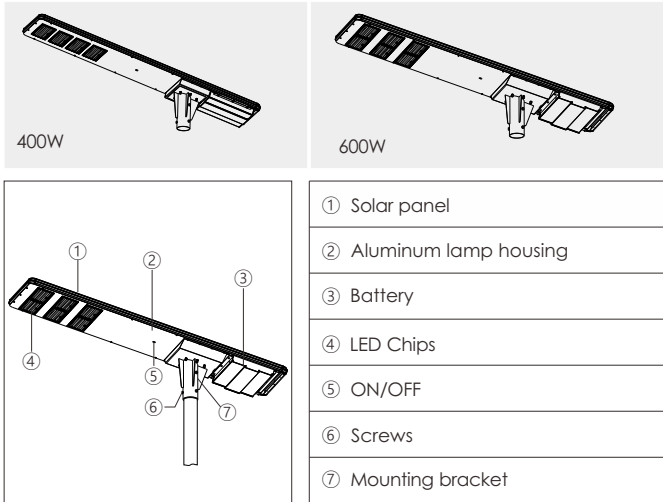

Thank you for choosing our product.

- For any questions, free to call or email us any time.
- Please refer to the actual product if the diagrams provided shows a slight difference.
- Before using the product, please read the following precautions carefully to avoid damage or errors.

Product Introduction

- Solar street light is a kind of electric light that converts light energy into electrical energy through solar panels. The advantage of this product is that there is no wiring, easy installation, and no electricity. During the day, solar panels absorb up to sunlight and convert it into electricity and store it in batteries. The lights turn on automatically at night.
- This solar street light has IP65 waterproof and dust proof function, can work safely in rainy days, avoid short circuit and fire. Suitable for outdoor use, adding a bright atmosphere to your garden, lawn, gate, road, etc.

Product Structure Description

Installation Guide

- 1 Secure the mounting bracket to the lamp body with screws. (See figure 1)

Figure 1

- 2 Insert the lamp into the light pole and tighten the screws, (see Figure 2). It is recommended to use a light pole with a diameter of 85-95mm.
